Local Computer Experts Earn Certification

Louisville, KY – Randy Evans, Elliott County School District; Russ Coal, Russell Independent School District; Jason Morrison, Fairview Independent School District; John Leistner, Ashland Independent School District; John Profitt and Lynda Congleton, Lee County School District; Charles Holbrook, Johnson County School District; Kelly Vice, Menifee County School District; Bill Jackson and Kathye Greene, Middlesboro Independent School District; Mark Woods, Pineville Independent School District; and Alex Skinner, Hopkins County School District recently earned their Apple Support Essentials advanced certification. The intense four-day training class and examination are designed for individuals who need to manage computer networks like those found in school districts.

These individuals completed the course as part of a series of training workshops offered by Dataseam, the company that provides classroom computers to schools in Kentucky using coal severance money. The training will help them better manage the increased number of computers now in the district.

“We have dramatically increased the amount of technology available to our students because it is critical for their continued success in today’s world,” said William Musick, Fairview Independent School District’s Superintendent. “We are committed to bring our students and teachers district wide the best 21st learning environment possible.”

In the last two years, Dataseam has conducted over 125 workshops and training sessions for over 3,500 teachers, administrators and technicians across the state of Kentucky. Over 235 advanced certifications have been earned by school district employees to help them better utilize technology in local schools. “We are pleased to bring these world-class training programs to Kentucky so schools can build truly modern education environment,” said Dataseam’s Chief Executive Officer, Brian Gupton.
